Video Production

Video Production Academy is a three-year program divided into Elements of video, Digital Video and Video Production. Using state of the art computers and software, students learn the technical art of animation and video production.
Students develop career and communication skills in video production using Adobe tools.
Students develop knowledge in storytelling, capturing and editing video and audio, and finalizing content for DVD or web through emphasis on design, project management, and video technology.
Students use professional cameras, tripods, microphones, lighting, and green screen technology to learn how to effectively tell stories through video projects
This academy is proud to have NYIT as our higher education partner offering college programs available to students in this academy

Web Design

Web Design Academy is a three-year program divided into Visual Design, Digital Design and Web Management. Using state of the art computers and software, students learn the technical art of design for print and web.

Graphic Design

The Graphic Design Academy is a three-year program that will teach the fundamentals of design, beginning through advanced typography, branding, packaging, motion graphics, and animation. The graduating student will produce a professional-quality portfolio suitable for working in the industry or for getting into a design college.
